Oregon Agriculture in the Classroom (AITC) Foundation is a nonprofit, education organization dedicated to helping students K-12 better understand agriculture, the source of our food and fiber, and its impact on our daily lives.

AITC provides free curriculum, hands-on activities, lending library, and teaching aides to K-12 teachers throughout Oregon. Visit the AITC web site and learn how to bring agriculture into your classroom - <http://AITC.oregonstate.edu>.

The ABC's of Oregon Agriculture

Oregon farmers grow and produce more than 225 different products. There is at least one for every letter of the alphabet. **Can you name them?**

Directions: List an agricultural product or by-product for each letter of the alphabet. There is more than one correct answer for some letters.

Be creative! Think of by-products. For example, foods like french fries, mashed potatoes, baked potatoes, are by-products of potatoes.

Example: In Oregon **A** is for - Apples, Alfalfa, Angus, Asparagus, Artichokes, Apricots, Arborvitaes, and Alpacas.

Provided by Oregon Agriculture in the Classroom Foundation.
