

# Teacher Reviews

“This is such a rich experience. I wish every teacher had the opportunity to attend.”

“I really appreciate the program and the donors. It was an amazing experience that not only enriched my knowledge of agriculture, but my students as well. Thank you for making this available for educators.”

“The opportunity to learn about the variety and diversity of Oregon's agriculture changed my outlook and how I approach it in the classroom. Thank you for allowing me to attend and learn as much as I did.”

# Teacher Reviews

"I am just extremely appreciative of the experience, both on a professional and personal level. It was eye opening to me and I feel it has given me more depth and understanding that I am able to bring to my students that I have not in the past. Thank you!"

"I've participated in both SAI East and SAI West and it is an amazing experience. The amount of information you learn during the week is not only beneficial to bring back to the classroom but also such great information to know as a consumer on this planet. I could easily keep going with how wonderful and fun this program is, but to sum it up every summer I look forward to when another SAI program will be added so that I can sign up."
